

Stable Microsystems Ltd

Quality Policy

The policy of this company is to provide an outstanding service, thereby achieving efficiency and long term profitability.

Our scope of certification is;

'Design, development and supply of electro-mechanical test equipment'

We will continually improve the organisation, our Quality Management System (QMS) and products through ongoing development and objectives and targets and we will carefully monitor progress to ensure improvement is realised and maintained.

Improvement is driven by:

- Co-operation with customers, partners and preferred suppliers.
- Implementation of best practice.
- Embracing technology.
- Encouraging personal development.
- Instigating system improvements.
- Providing products which are fit-for-purpose.
- Conforming to all relevant standards and legal requirements.
- Meeting customer requirements and expectations.

We have therefore adopted and implemented a QMS which complies with the international standard ISO 9001: 2008 and had this externally assessed and registered by a UKAS-Accredited Certification Body.

Awareness of our policy and the relevant requirements of our QMS, amongst all employees and others who work for us is crucial. To this end we have a programme of training and awareness, which ensures that staff competence and awareness is maintained, and a process for ensuring that suppliers are fully aware of our required standards.
