TEXTURE ANALYSIS
training course

**PLEASE
COMPLETE
THE FORM
ON PAGE 4**

This training course has been prepared to enhance your texture analysis knowledge and techniques.

The emphasis is very much 'hands on' practical applications, assessment of curve analysis and interpretation of results on a team and individual basis.

The course is ideally for users of Stable Micro Systems Texture Analysers who have operational experience of the instrument and require further knowledge of the complete range of analytical techniques available from both the hardware and software features.

The course will also cover testing tips and typical troubleshooting examples that may have been encountered.

Course Dates: 19-21 October 2010

Venue: The Mandolay Hotel, Guildford, Surrey, UK

www.stablemicrosystems.com

Course Content:

- Test Selection and Settings
- Probe Selection and Troubleshooting
- Sample Presentation and Managing Variability
- File/Data management
- Data Manipulation and Display Options
- Design and use MACROS to automate analysis
- Design and use PROJECTS to automate testing
- Interpret texture graphs

The course will also include a review of:

- Application Studies
- Software Help menus
- Published paper abstracts
- How to automate tests using macros
- Use of variables in macros and test sequences to simplify calculations and to statistically analyse data
- Use of peripherals such as temperature, humidity, resistance modules
- How to plot additional data
- Security

**Accommodation:
The Mandolay Hotel
Guildford, Surrey**

The Mandolay is one of Guildford's premier hotels. The Conference centre offers the best facilities in Surrey and the m.Brasserie and Grill and m.Bar provide the ideal spaces for relaxation after a hard day's training.

www.guildford.com

Cancellation Policy: 50% course fee refund for cancellations up to 4 weeks before the training course. Refunds will not be available for cancellations received after this date but an alternative delegate can be substituted without penalty.
